PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on experience building scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in developing RESTful APIs, JWT-based authentication systems, real-time applications using Socket.IO, and AI-integrated platforms, with experience deploying production-ready applications on cloud platforms. Strong understanding of backend architecture, database design, and secure application development with a focus on performance, scalability, and clean code practices.

TECHNICAL SKILLS

Languages	JavaScript, Java, HTML5, CSS3
Frontend	React.js, Tailwind CSS, Framer Motion, Responsive Design
Backend	Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO, MVC Pattern
Database	MongoDB, Mongoose ODM, Database Design & Indexing
Tools & Cloud	Git, GitHub, Postman, VS Code, Antigravity, Cloudinary, Vercel, Render, Railway

PROJECTS

ResumeAI Coach — AI-Powered Resume Analyzer & Interview Prep Platform | *GitHub* | *Live*

- Built a production-ready full-stack AI platform integrating Google Gemini API for real-time ATS scoring, keyword gap analysis, and AI-powered interview preparation across Technical, HR, and Resume-based modes.
- Implemented secure authentication using JWT (httpOnly cookies), Google OAuth 2.0, and OTP verification; integrated PDF upload and Cloudinary-based file handling for efficient resume processing.
- Developed an analytics dashboard to track resume insights and interview history; optimized MongoDB queries and implemented request limiting for better performance and scalability.

ChatApp — Real-Time Full-Stack Chat Application | *GitHub* | *Live*

- Built a real-time MERN chat application with 1-to-1 and group messaging using Socket.IO, including typing indicators, online status, message seen/delivered ticks, and infinite chat scrolling.
- Implemented secure JWT authentication with OTP email verification, Google OAuth 2.0, Zod validation, rate limiting, and user blocking functionality to improve application security and user control.
- Integrated Cloudinary for media sharing and developed group management features with admin controls, paginated messages, and optimized real-time communication APIs.

StyleStore — Clothing E-Commerce Platform | *GitHub* | *Live*

- Built a full-stack e-commerce platform with product catalog, shopping cart using Redux Toolkit, order management, and Admin dashboard with inventory and stock control; integrated Stripe Payment Gateway for secure checkout.
- Implemented JWT authentication, Google OAuth 2.0 login, OTP email verification, protected APIs, and role-based access control for Admin and Customer workflows.
- Optimized application performance with MongoDB search, lazy loading, pagination, and responsive UI components to improve scalability and user experience.

PROFESSIONAL EXPERIENCE

Full-Stack Web Development Intern (Remote) Jun 2025 – Jul 2025

Prodigy InfoTech

- Contributed to development of scalable web applications using React, Node.js, Express.js, and MongoDB, gaining end-to-end product delivery experience within an agile environment.
- Built and tested RESTful APIs using Postman, implemented JWT authentication middleware, and developed responsive UI components following modern development practices.

EDUCATION

Bachelor of Technology — Computer Science & Engineering 2023 – 2027

College of Engineering Roorkee (COER University), Uttarakhand

4th Year | Current CGPA: 7.07 / 10

CERTIFICATIONS & ACHIEVEMENTS

30-Day Skill Development Training Program | HCL GUVI in collaboration with COER University (2026)

- Completed 30-Day Skill Development Training Program covering Data Structures & Algorithms (DSA), Artificial Intelligence (AI), and Emerging Technologies & Tools (180+ Hours, 2026).

National Level Hackathon — Manthan'25 | COER University (2025)

- Participated in the National Level Hackathon organized by COER University (2025).
